Which Trade is Right for Me?

Agriculture, Food & Natural Resources

Popular Careers: Agricultural Inspector, Agronomist, Wildlife Administrator
Agriculture, food, & natural resources teaches CTE students about how human life is sustained around the world.

This allows graduates to pursue a wide range of careers, as agriculture is an enormous field. Students can go on to become farmers themselves — but that's only the most obvious career.

They can also work as inspectors, lab technicians, administrators, and researchers.
